

NÍLBER REMÓN

DATA/CLOUD/ANALYTICS/AI/SOFTWARE ENGINEER | SOLUTION ARCHITECT

nilberremon@gmail.com | (954) 864-0952 | New York, New York | [linkedin.com/in/nilberremon](https://www.linkedin.com/in/nilberremon) | nilber.dev

PROFESSIONAL PROFILE Cloud-focused Data & Software Engineer leveraging a unique background in non-profit leadership to build resilient, scalable and user-centric cloud/data ecosystems. Combining 4+ years of deep technical expertise in data, infrastructure, automation, powering AI solutions and consulting with a decade of operational management experience. Unlike traditional engineers, I offer a proven ability to align complex technical architecture with organizational mission, bridging the gap between code and human impact in cross-functional environments.

SKILLS

- **Languages and Frameworks:** Python, JavaScript, Node.js, SQL, Rust, Bash, NoSQL, React
- **Cloud:** AWS (Lambda, S3, EC2, ECS), Google Cloud (Run, IAM, VertexAI), Azure (Fabric)
- **Data:** BigQuery, Snowflake, Redshift, PostgreSQL, Transformation Workflows (Dataform, dbt), Beam, DAGs (Composer, Airflow), Event-Driven Architecture (Kafka, PubSub), Airbyte, Prefect, BI Dashboarding (Looker)
- **AI/ ML:** AI Agent Architecture/Orchestration, LLM Tooling, GenAI, AI Dev Tools, Prompt Eng., MLOps, MCP
- **Infrastructure and DevOps:** Docker, Kubernetes, Infrastructure as Code (IaC) (Terraform), CI/CD, GitOps

PROFESSIONAL EXPERIENCE

Feb 2021 - Sept 2025 **Data Engineer 2 - Adswerve** (AdTech consulting firm). NY, NY

- **Enterprise Solution Delivery:** Served as a primary technical consultant for enterprise clients, leading cross-functional teams on enterprise-scale projects, architecting and delivering solutions for strategic business initiatives and POCs. Led discovery sessions and guided clients through the adoption of complex cloud and data ecosystems. Translated technical architectures into clear business value, enabling non-technical stakeholders to leverage their data effectively. For example, I designed and developed a cloud-based solution scaling and streamlining web analytics and social media targeting implementations across thousands of web properties.
- **Stakeholder Engagement and Education:** Provided cloud and data engineering knowledge expertise and training to enterprise clients and internal stakeholders. Supported clients with solutions and practices that enabled hundreds of thousands in cost savings for cloud and data infrastructure and services. Optimized automated SQL queries and SQL workflows resulting in thousands of dollars in savings for large-scale clients.
- **Cloud Automation & Data Ecosystem Design:** Devised, built and automated data architectures, batch and streaming ELT/ETL pipelines and orchestration workflows to centralize and standardize marketing, analytics and client data enabling unified reporting and advanced data modeling work. Solutions that processed, transformed and transferred daily from thousands to millions of streamed and/or batched data points/records. Architected and developed an event-driven data warehouse hub ecosystem for an enterprise client with pipelines to nearly two dozen disparate data sources ingesting millions of total records daily.
- **AI Implementation:** Partnered with data scientists to deliver predictive, generative AI, agentic and machine learning models and solutions. Supported the design and development of LLM-powered, RAG-enhanced and agent-driven Gen AI applications and tooling. These solutions helped provide clients with a 85% increase in return on ad spend while reducing cost 35% per conversion.
- **Product Development:** Built reusable, modular applications and internal tooling, developing solutions through an end-to-end agile software development lifecycle - from technical design to testing, deployment, and delivery. Rigorously pursued automation of tasks and processes to increase productivity. Containerized and productized recurrent client use cases, including data migration across clouds.
- **Cloud-Native Microservices Architecture:** Architected and deployed scalable, API-first microservices (REST/GraphQL) on cloud platforms using Python. Defined engineering standards for service-oriented architecture, resulting in a 30% reduction in time-to-market and eliminated long-term technical debt.
- **Cloud Infrastructure:** Applied IaC practices in solutions that automated cloud resources and services provisioning for greater reliability and reusability, reducing development time for the engineering team by 80% (hundreds of labor hours) and slashing errors and bugs by 75%.
- **Data Activation:** Engineered, managed and maintained data warehouse and reporting solutions facilitating advanced analytics, attribution modeling, marketing activation and business intelligence decision-making (Tableau, Sigma). Across projects accelerated client insights and achievement of conversion and sales goals.

NÍLBER REMÓN

DATA/CLOUD/ANALYTICS/AI/SOFTWARE ENGINEER | SOLUTION ARCHITECT

- **Data Analytics:** Built and supported web analytics and data measurement implementations (Google Marketing Platform, Adobe Experience Platform) on websites and web apps serving up to millions of daily users. Optimized data fidelity and identity stitching, driving conversion goals up by 35%.
- **UI/UX Design:** Designed immersive and responsive front-end apps and interfaces (React, Next.js, Streamlit) with AI integrations, enhancing stakeholder and user engagement and experience.

Jan 2020 - Jan 2021 **Front-End Web Development Study Lead – Pursuit. NY, NY**

- **Front-end Instruction:** Facilitated in-depth study sessions on front-end web development. Guided fellows through hands-on projects, enhancing their practical skills and understanding of front-end tech.
- **Mentorship:** Provided mentorship office hours on front-end development, UI/UX design and web frameworks.

Jan 2019 – Jan 2021 **Data and Evaluation Manager – Fund for the City of New York: Zone 126 Project**
(Non-profit public education organization). **NY, NY**

- **Data Governance & Quality Assurance:** Designed and enforced organizational data quality controls and integrity protocols. Oversaw the end-to-end data lifecycle, ensuring accuracy and reliability for critical internal reporting and stakeholder analysis.
- **Strategic Data Operations:** Directed data analytics and reporting initiatives, transforming raw data into actionable insights to drive organizational strategy. Established key performance indicators (KPIs) to measure program efficacy and operational success.
- **Team Leadership & Performance Management:** Managed and mentored a team of data evaluation staff. Implemented metric-based performance tracking to optimize team output, foster professional development and ensure alignment with organizational goals.
- **Process Standardization:** Developed and implemented comprehensive Standard Operating Procedures (SOPs) to streamline data ingestion and processing workflows. Reduced manual redundancy and improved the speed and consistency of data deliverables.

Mar 2013 – Dec 2018 **Associate Director of Quality and Operations, AIDS Healthcare Foundation: Public Health Division (PHD)** (Non-profit public health organization). **Fort Lauderdale, FL**

- **Enterprise Operations Leadership:** Directed national operations and quality assurance for a major public health organization. Designed and scaled enterprise-wide operational architectures across logistics, procurement, assets and facilities, ensuring seamless service delivery at a national scale.
- **Data Analytics & Governance:** Oversaw the end-to-end data lifecycle for nationwide organizational data, including designing data quality controls. Analyzed organizational datasets to identify friction points in service delivery and leveraged these insights to drive process improvements and correct regional deviations, ensuring high-quality patient care and 100% regulatory compliance across jurisdictions.
- **Workflow Optimization & Process Design:** Re-engineered legacy operational workflows to eliminate bottlenecks and reduce latency in service delivery. Established and standardized national SOPs and processes to ensure consistency and reliability across distributed regional teams.
- **Organizational Change Management:** Led diverse, cross-regional teams through complex operational pivots and policy updates, fostering a culture of adaptability and resilience during high-pressure public health scenarios.
- **Fiscal Governance & Resource Allocation:** Orchestrated a \$1.3M annual operating budget, implementing rigorous auditing protocols to maximize resource efficiency and maintain strict compliance with complex governmental grant requirements.
- **Cross-Functional Stakeholder Leadership:** Bridged the gap between clinical, administrative, and government stakeholders. Translated complex regulatory constraints into actionable operational strategies and led national training initiatives to upskill management and staff.

EDUCATION AND CERTIFICATIONS

- Jan 2025 [Google Cloud Professional Data Engineer Certificate](#)
- Sept 2019 - Sept 2020 Pursuit | Full-stack Software Engineering | Intensive 12-month fellowship
- Aug 2003 - Jun 2007 University of Miami | Major: Geography and Geographic Information Systems
